

BASEBALL AND SOFTBALL VIDEO SYSTEM

Batter, Pitcher Analysis + Self/Opponent Scout + Recruiting + Umpire Tendencies = More Wins

- Record only the exact action you want.
- Automatically synchronize video clips for each pitch from different recorded angles.
- Capture everything from anywhere on the field

CONTROL MULTIPLE CAMERAS AND
BLUETOOTH DEVICES WITH ONE
WIRELESS CONTROL

- Connect your phone via bluetooth for multiple angles
- High frame rate for more details available

- Start and stop recording(s) with a hand-held wireless remote
- Video only the action, eliminating useless video
- Get a synchronized video clips from each camcorder for each play
- Easily upload your video into Hudl or other systems
- Create Highlight and Recruiting Videos
- Give players and parents access to the video to create their own recruiting videos. Easily Tag plays to review with players
- Review plays from different angles. Show the pitch from behind the plate and then show the swing from the baseline
- Control of multiple (1-16) camcorders and or bluetooth phones
- No subscriptions or annual fees
- Record in slow motion from mobile device
- Compatible w/ Sony camcorders, Apple and Android phones

“For almost 3 decades our work required 3 people to create our video data. The Air Potato has been life changing. Now we never miss video clips and we are much more efficient with the data collected and we need 3 less people to run our system.”

- Bob Keyes - Owner/Operator Mountain West Baseball Academy

“The biggest benefit is the instantaneous feedback from what we see during practice from different angles. I get to slow it down as much as I like to watch quality at bat. I show it to the kids and they get to see what they are doing right and wrong.”

- Coach Travis Yoder, Highland Park HS, TX
