

## Camcorder

- **Picture quality when using projector**
- **60 frames per sec max**
- **Good view from center field**
- **Confirmation of Record/Pause**
- **No pairing necessary**
- **All Camcorders range 300+ yards**
- **Receiver can control 2 Camcorders, capture batter and pitcher simultaneously**

## Phone

- **Lower Cost**
- **120 frames per sec for slow motion analysis**
- **Handheld controls 1 Phone**
- **1 Phone needs to be within 60 ft of hand held**
- **Receiver can control 1 phone 300+ yards away**
- **Only specific camera apps work with system**

### BUILD A SYSTEM THAT MEETS YOUR NEEDS

- **Camcorders and Phone Camera can be used with the same system. Use phones in the infield and a camcorder in the outfield**
- **One receiver can control 2 camcorders and 1 phone camera. Use camcorder to capture batter and phone to capture pitcher.**
- **A good value is to have the Handheld control a baseline phone camera close to your dugout, a receiver controlling phone camera on other baseline and have a receiver controlling a camcorder in the outfield**

**System is compatible with most Sony Camcorders, many Sony Digital cameras and most camera phones with the correct camera app.**
